CITY OF ALBANY:

PUBLIC WORKS

Project Update Notice

APRIL 30, 2024

Upcoming Roadway Surface Improvements!

During the month of May the City will be working with Knife River and their subcontractors to improve many of the local roadways in Albany. Bituminous mill and overlay work will be starting around mid-May and will take approximately two weeks. A map of the roadways that will be improved is shown below.

In some areas the Contractor will also be replacing some of the storm sewer catch basins and the curb on both sides. This work will be starting this coming week, starting on Monday, May 5th.

What this means for you: The project work is being funded by the City and you are not be assessed for these surface improvements. We do ask that you try to keep vehicles off of the street as much as you can during the work. Small boulevard "No-Parking" signs will be posted prior to the milling and paving work.

Please direct any questions to the Stantec team members listed on the left side of this notice. Thank you for your cooperation during this project!
